

## BAS-P/U in english

Released the 1st of January 2009, there are amendments to the demands regarding Civil and Engineering work Provisions from the Work Environment Authority.

At any civil and engineering work, there must be a coordinator of building work within planning phase (BAS-P) and construction phase (BAS-U). Those regulations accords to smaller construction work as well. The client is obliged to appoint the coordinator. The assigned must be able to verify in written form, the education, competence and experience. The competence requirements are current since 1st jan 2011. A person who commissions building or civil engineering work can remote all responsibility and assignments according working environment to a turnkey Contractor. The requirement is a written contract and an independent stand in relation to the customer.
